

### **Alan Frohbieter**

Vice President and Technical Director  
Ball Aerospace

Alan Frohbieter is the Vice President and Technical Director for Ball Aerospace. In this role, Frohbieter is responsible for facilitating innovative technology collaboration and successful program execution strategies across the company. He is also responsible for leading the strategy and implementation of new technologies and processes.

Frohbieter has held many leadership positions at Ball Aerospace. Most recently, he served as the Vice President of Space Products where he was responsible for program execution, system design and space hardware product line management for the Commercial Space, Civil and Operational Space and National Defense strategic business units.

Frohbieter joined Ball Aerospace as the Program Manager for the QuickBird program in the mid-1990s. Prior to joining Ball, he had a 14-year career with Lockheed Martin Astro Space (formally RCA AstroSpace). While at Lockheed Martin he held numerous positions with increasing responsibility including program management, systems engineering and spacecraft design engineering.

Frohbieter earned a B.S. in Mechanical Engineering from Rutgers University.
