Policy

Scope: This information on Environmental, Health and Safety applies to Ball Corporation, its divisions, operations, subsidiaries, or greater than 50 percent owned joint ventures ("Ball").

Policy: Ball is committed to the following:

- The health, safety and well-being of our employees by providing safe and healthy workplaces and
- Environmental protection by reducing our environmental footprint, including our impact to air, land, water and energy consumption.

We aim to ensure that suitable measures are in place to eliminate and mitigate risk to protect our employees and the environment as well as our assets. We give equal importance to Environment, Health and Safety (EHS) aspects as to any other key business processes. We manage EHS risks by constantly evaluating risks and then working to eliminate and/or minimize those risks based on their potential severity.

Management is responsible and is held accountable for ensuring that EHS practices are adopted and followed in our operations with the goal of creating a culture focused on safety and preventing occupational injuries and illnesses consistent with our sustainability goals.

All our employees and contractors are expected to work safely in accordance with Ball requirements.

Ball will implement programs to comply with all applicable regulations and other requirements in the countries we operate. Beyond regulatory compliance, we will share best practices which should result in improved safety and environmental performance in our global operations. Methods to continuously improve EHS performance will be implemented, documented, updated, and routinely reviewed by business leaders.

Protecting our employees and our global environment is vital to our business and the communities where we operate. Our performance relative to health and safety and environment will be routinely reported in our sustainability reports. Open and transparent communication with stakeholders is critical in helping us to continuously improve our performance regarding health and safety and environment.
