

# Standard Aluminum Aerosol

For everything from personal care to household products, Ball's line of infinitely recyclable impact extruded aluminum aerosol cans are manufactured with a diversity of internal coatings and across all specifications.

Furthermore, our printing capabilities include unparalleled innovative graphic solutions to help differentiate your product on the shelf.

## HIGHLIGHTS

- Hi-definition printing; no labels needed
- Allows for creative design options via extraordinary graphics
- 9-color printing
- Various finishes available including matte, semi-matte, gloss, pearlescent, and metallic
- Packaging communicates premium, high quality content
- Aluminum package is infinitely recyclable
- Unbreakable
- Protects product from light

## NOTES

- All cans have a standard 1" opening
- Variety of specs available: N2P, 2P, 2Q; 12, 15 and 18 bar
- Rolled or machined curls/bead
- Variety of internal coatings including: BPANI, epoxy phenolic gold (or pigmented), PAM (polyamide-imide), organosol
- Transfer shoulder will accommodate most 3-piece tinplate overcaps
